[REDACTED] Comment. Since light AT guns were also observed, the trains probably carried elements of the Mechanized Regiment Oranienburg which returned from the Kliets troop training grounds. Since the number of tanks and heavy-duty flatcars on these trains and on the KVP trains on 26 and 27 September 1954 exceeds the tank equipment of an individual mechanized regiment, it is believed that contingents of both the mechanized regiment and the medium tank regiment returned from the Kliets troop training grounds.
